

Spierings provides smart logistics solutions, varying from transportation and storage to Value Added Logistics to ensure peace of mind for its customers. Its service provision is sustainable, fast and cost effective, with an emphasis on a personal approach and contact. Spierings processes personal data of employees, customers and suppliers in the course of carrying out its services.

Management and the quality manager ensure proper monitoring of correct compliance with the rules. They also serve as a first point of contact if a data subject has a privacy-related question.

The 8 Spierings privacy themes

1. Spierings only consults and processes personal data if this is necessary for achieving a specific and predetermined purpose;
2. Spierings never processes more personal data than necessary and does not retain personal data for longer than strictly necessary;
3. Within Spierings continuous efforts are made for privacy control by means of internal audits and the appointment of a contact person for privacy related questions;
4. Any security incident that involves personal data will be reported to the Incidents Disclosure Office as soon as it is discovered;
5. Spierings is transparent about how it processes personal data and about the rights that data subjects can exercise;
6. Customers have the possibility to exercise control over their personal data;
7. Spierings applies a uniform approach to Privacy;
8. Data subjects can submit complaints to the Dutch Data Protection Authority (AP) about the manner in which Spierings handles their personal data.

People must be able to exercise control

Rights of those concerned
